

# Lecture Announcement

(Oct. 2018-Jan.2019 / 2 credits)

## Advanced Course of International Science Communication Methods

(Language: All in English)

- *FIRST LECTURE* -

Time: 13:00-14:30 on October 5 (Fri.)

Place: D-101 in GSES Bldg. (N10W5)

Lecturer: Ralf GREVE (Inst. of Low Temp. Sci.)

### Objective:

Modern English is the dominant language, and often even the required international language, science, business, and many other fields. Working knowledge of English has, therefore, become imperative, especially for scientists.

In this lecture, different kinds of communication methods in an international environment will be overviewed and experienced. Writing a report, presenting a review and discussing scientific issues are among the examples. Students will learn the fundamental philosophy and skills for working under international relationship.

### Grading:

Attendance, presentation of own research, group discussion, and report of writing exercise.

### Schedule:

1. Presenting (7 classes); 2. Discussing and debating (4 classes); 3. Writing (4 classes)
